

MTA

AUDIO EDITOR

MTA Audio Editor - modern multitrack production

Editing, mixing, effects, lyrics/chords, AI and MTA export in one environment.

Multitrack

Timeline, waveforms, clips, markers, undo/redo and autosave.

Mixer & FX

Volume, pan, mute/solo, insert FX and render preview.

Lyrics & Chords

TXT, PDF, ChordPro and synchronized display during playback.

Export

MTA8/MTA16, WAV, MP3, FLAC and karaoke MP4.

Native & Mobile

Desktop, browser, Android, iPhone and iPad.

AI

Whisper, forced alignment, Demucs and updatable models.

Interface

Real editor view.

Workspace

Tracks, waveforms and timeline in one workspace.

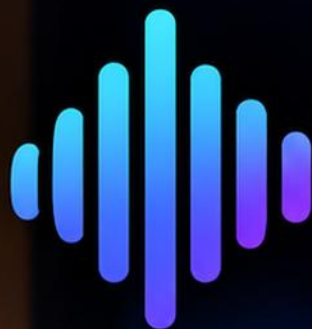

Live controls

Show Lyrics and Show Chords follow playback.

Security

Roles, TOTP and email workflows.

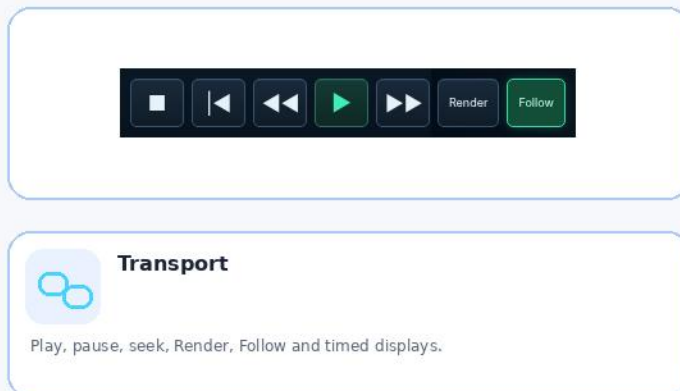

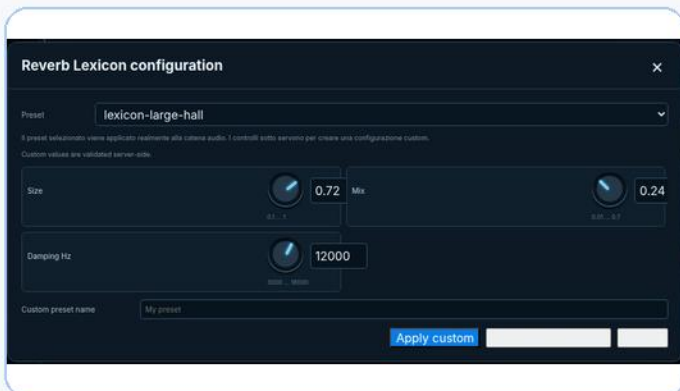

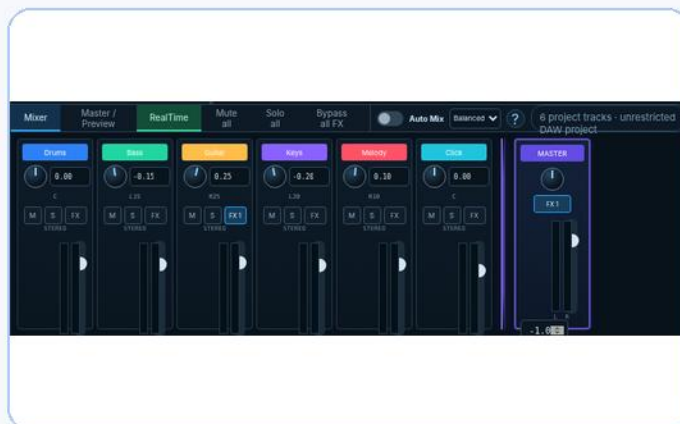

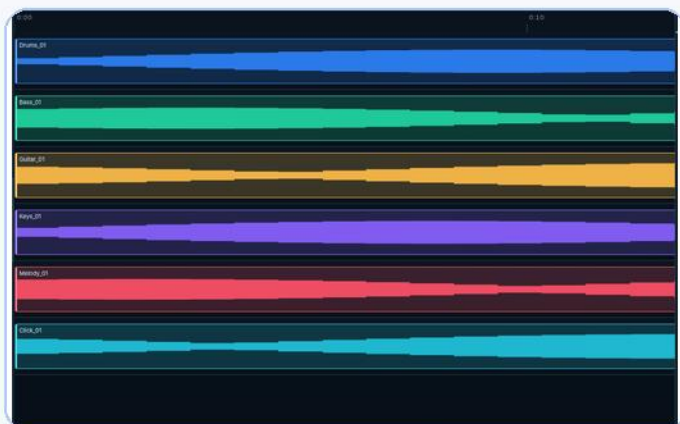

MTA

AUDIO EDITOR

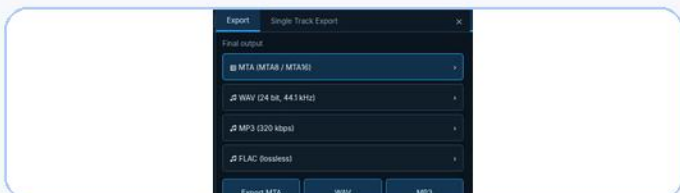

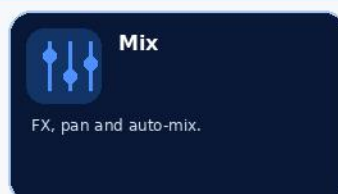

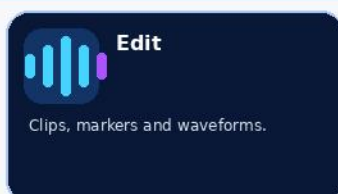

Interface, editing and mixer

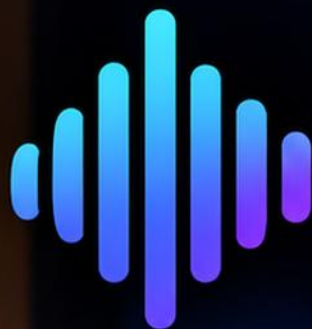

Real interface snapshots and core controls.

Operational workflow

Compact cards with readable content.

MTA

AUDIO EDITOR

Lyrics, chords, karaoke and AI

Accurate transcription and synchronized text/chord timelines.

Dynamic playback synchronization

1. Buffer

wait for every track

2. Align

same transport time

3. Start

one reference clock

4. Correct drift

continuous re-alignment

Seek, Resume and |◀ re-arm all active sources at the same position.
Render mode uses the rendered master as transport clock while track meters run on a silent monitor branch.

MTA file organization

EBML / Segment / SeekHead / Info / Tracks / Attachments / Cues

Media region from first Cluster to EOF

fixed 984-byte periodic XOR transport over canonical Matroska media bytes

Audio streams

MP3 44.1 kHz stereo, frame-major blocks

Metadata / attachments

MovieInfoData, lyrics, chords, colors, MIDIK

Word timestamps

Word-by-word timestamps from
Whisper.

Forced alignment

Acoustic realignment for precision.

Syllables

Phonetic/syllabic MTA split.

Chords

Chords based on word/syllable timing.

Quality

compile · Ruff · pytest
coverage gate ≥ 70%

Security

Bandit · pip-audit
Gitleaks · Trivy FS

Container gate

build · Trivy image
authenticated smoke test

Publish

amd64 + arm64
SBOM + provenance

push main

→ desalvo/mta-audio-editor:latest

push tag

→ image:<tag>

Completeness

Always starts at the beginning, deduplicates and
reduces incomplete phrases.

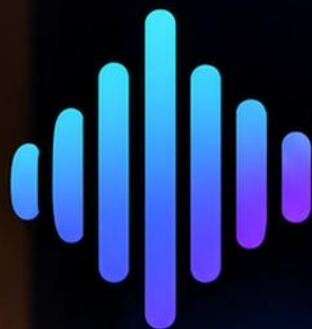

Display live

Current lyric and chord during playback.

Output

PDF, TXT, ChordPro and karaoke MP4.

MTA

AUDIO EDITOR

Platforms and workflow

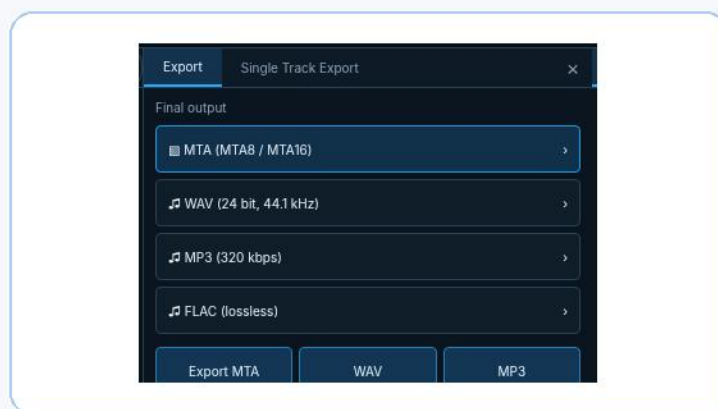

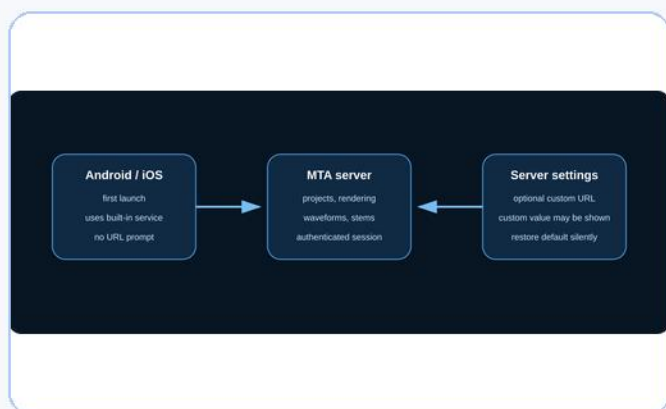

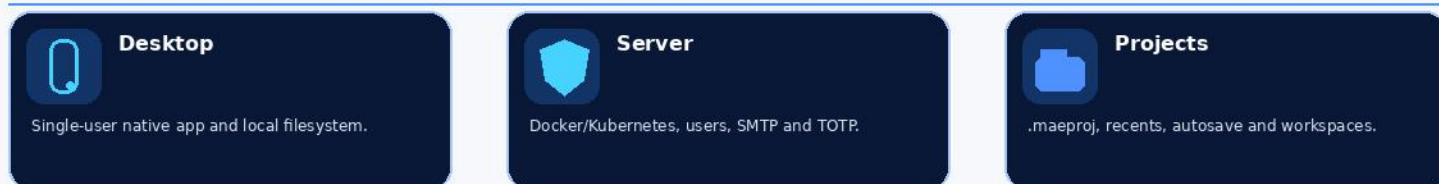

Desktop, mobile and server share the same project model.

Supported platforms

Deployment

Desktop, server and mobile.

Compact flow

Import -> Edit -> Mix -> Export
