

MTA

AUDIO EDITOR

MTA Audio Editor - produzione multitraccia moderna

Editing, mix, effetti, lyrics/chords, AI e export MTA in un unico ambiente.

Multitrack

Timeline, waveform, clip, marker, undo/redo e autosave.

Mixer & FX

Volume, pan, mute/solo, insert FX e render preview.

Lyrics & Chords

TXT, PDF, ChordPro e display sincronizzato durante il play.

Export

MTA8/MTA16, WAV, MP3, FLAC e MP4 karaoke.

Native & Mobile

Desktop, browser, Android, iPhone e iPad.

AI

Whisper, forced alignment, Demucs e modelli aggiornabili.

Interfaccia

Vista reale dell'editor.

Workspace

Tracks, waveform e timeline nello stesso spazio.

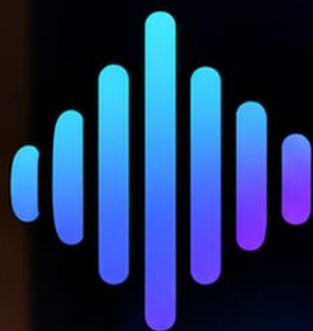

Controlli live

Show Lyrics e Show Chords seguono il playback.

Sicurezza

Ruoli, TOTP e workflow email.

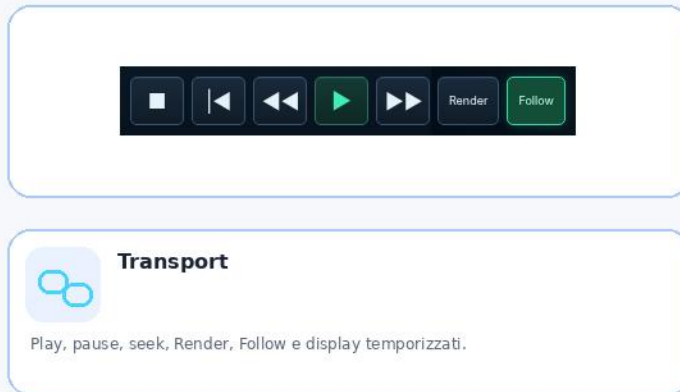

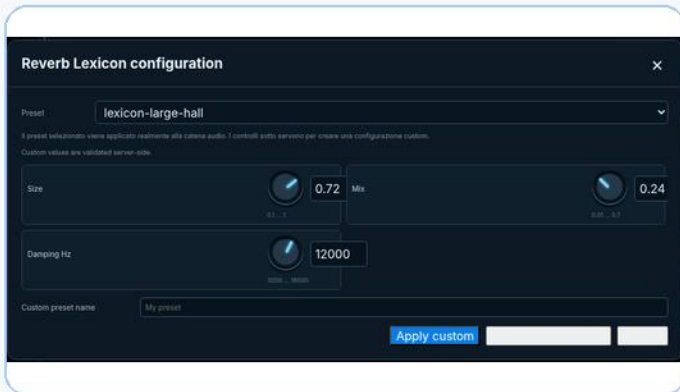

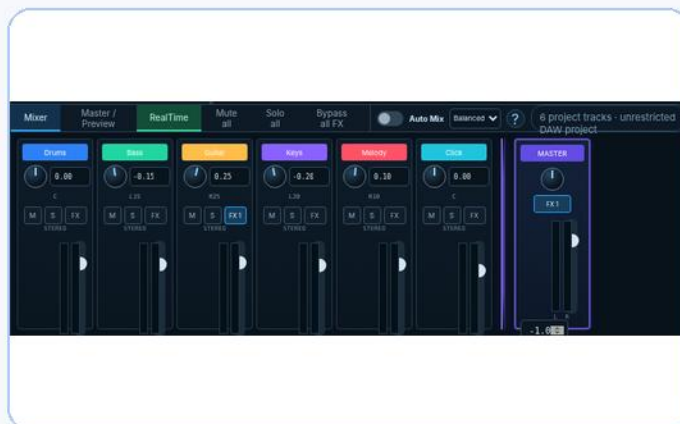

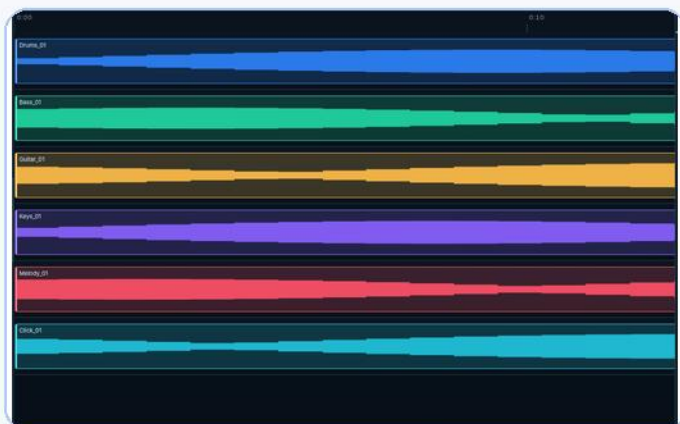

MTA

AUDIO EDITOR

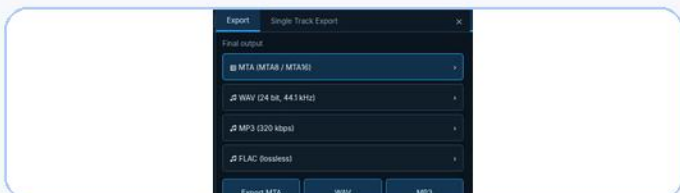

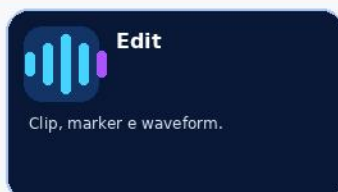

Interfaccia, editing e mixer

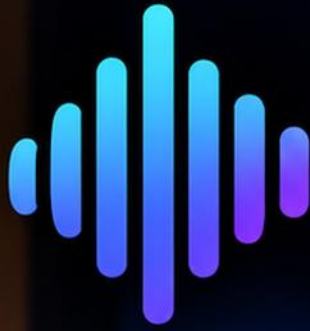

Snapshot reali dell'interfaccia e controlli principali.

Workflow operativo

Box compatti con contenuti leggibili.

MTA

AUDIO EDITOR

Lyrics, chords, karaoke e AI

Trascrizione accurata e timeline sincronizzata per testo e accordi.

Dynamic playback synchronization

1. Buffer
wait for every track
2. Align
same transport time
3. Start
one reference clock
4. Correct drift
continuous re-alignment

Seek, Resume and |< re-arm all active sources at the same position.
Render mode uses the rendered master as transport clock while track meters run on a silent monitor branch.

MTA file organization

EBML / Segment / SeekHead / Info / Tracks / Attachments / Cues

Media region from first Cluster to EOF

fixed 984-byte periodic XOR transport over canonical Matroska media bytes

Audio streams

MP3 44.1 kHz stereo, frame-major blocks

Metadata / attachments

MovieData, lyrics, chords, colors, MIDIK

Word timestamps

Timestamp parola per parola da Whisper.

Forced alignment

Riallineamento acustico per precisione.

Sillabe

Suddivisione fonetica/sillabica MTA.

Chords

Accordi basati sul timing parola/sillaba.

Quality

compile · Ruff · pytest
coverage gate ≥ 70%

Security

Bandit · pip-audit
Gitleaks · Trivy FS

Container gate

build · Trivy image
authenticated smoke test

Publish

amd64 + arm64
SBOM + provenance

push main

→ desalvo/mta-audio-editor:latest

push tag

→ image:<tag>

Completezza

Parte sempre dall'inizio, deduplica e riduce frasi incomplete.

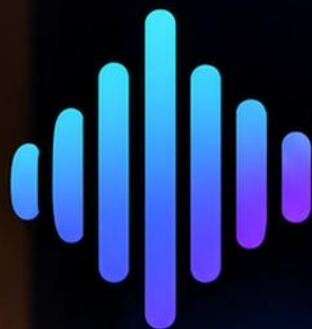

Display live

Lyrics e chord correnti durante il play.

Output

PDF, TXT, ChordPro e MP4 karaoke.

MTA

AUDIO EDITOR

Piattaforme e workflow

Desktop, mobile e server condividono lo stesso modello di progetto.

Piattaforme supportate

Windows

macOS

Linux

Android

iOS

Deployment

Desktop, server e mobile.

Desktop

App native single-user e filesystem locale.

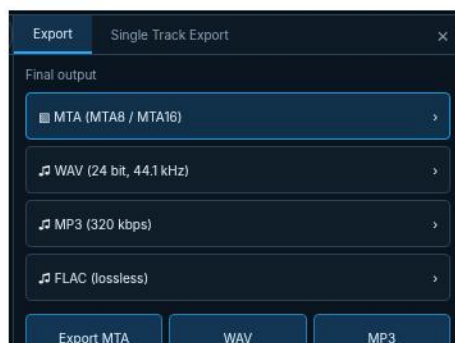

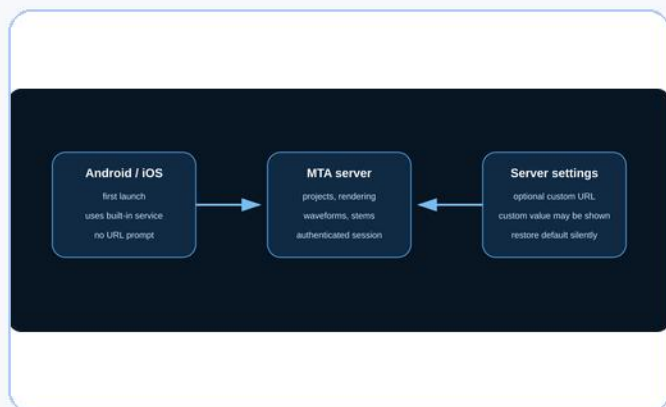

Server

Docker/Kubernetes, utenti, SMTP e TOTP.

Progetti

.maeproj, recenti, autosave e workspace.

Flusso sintetico

Import -> Edit -> Mix -> Export
